

BANKER GIVES HOSPITAL- WITH NURSE AGE 100.

Attendants Will Be More Than 30 Under Will of Sebastian Laurence.

ORDERS FENCE PAINTED Monument Over Grave Must Never Be Cleaned, for That Hurts the Stone.

An estate of \$93,312.55 is disposed of under the will of Sebastian D. Lawrence, who was a retired New York banker and lived in New London, Conn. He was 80 years old at the time of his death. The city of New London was remembered generously with \$100,000 for a hospital, \$100,000 for a free library, \$20,000 for a soldiers' and sailors' monument, \$12,000 for a memorial group of the testator's father, mother and three brothers to be erected in a park surrounding the hospital, \$4,000 for a fountain and other ornaments in the park and \$50,000 for a new almshouse.

Mr. Lawrence also left \$5,000 to be deposited in two savings banks the interest to be used each year in providing for the inmates of the almshouse old-fashioned Thackeray and Fourth of July dinners of first quality. He directed that the fence of the cemetery in which he is buried be painted every year with pure white lead and that the Lawrence name on the fence be bronzed every two years. He directed that his monument never be cleaned because "the coating preserves the stone."

The testator left \$100,000 to the Protestant Episcopal Church of Connecticut for general uses and \$20,000 to aid in establishing new churches. He directed that the soldiers and sailors' monument be erected by fifty feet high and twenty feet wide at the base and be something different from the general run of soldiers' monuments. He asked that the family group of his parents and brothers be erected in the cemetery in which he is buried. Mr. Lawrence left a trust fund of \$200,000 to support the hospital, with the income beginning at \$12,000 and increasing until \$20,000 a year was paid to run the hospital. He asked that no nurse be employed under thirty years old. Mr. Lawrence directed his executors and trustees to hold all his securities which are now of little value until their face value can be realized. The list of the securities includes 3,000 shares of stock in three mining companies which are worthless.

Only \$1,692.585 of Mr. Lawrence's property is in this State, and a tax will be collected on that sum. The transfer tax in Connecticut amounted to \$259,877. The will left \$2,300 to the executors as trustees for various purposes. The bulk of the property will eventually go to the nephews and nieces and to more remote ones. Among the beneficiaries are: Mrs. Lawrence, a niece, \$36,425 to Mrs. Josephine B. Lawrence, a niece, and \$19,000 to Edward R. True, Jr., a grandnephew.

The bulk of the estate is represented by the value of Mr. Bryce's real estate holdings. Out of the net estate of \$257,924 Mr. Bryce left half to his brother George D. Bryce, and half to his wife, Elizabeth S. C. Bryce. Mr. Bryce's real estate, books, pictures and works of art were valued at \$12,250.

FOUNDERS DAY CELEBRATED.

New York University Holds Exercises on Eightieth Birthday.

The eightieth anniversary of the founding of New York University was celebrated yesterday morning by the annual founders' day exercises held in the auditorium of the library building at University Heights under the auspices of the senior class.

The opening address was made by Edwin C. W. Hipperger, vice-president of the class of 1912, in the enforced absence of the president. He was introduced by the chairman of the exercises, Albert Nixson. C. W. Hipperger gave a history of the university from the date of its founding in 1832 to the present time, giving the aims and plans under its successive Chancellors and showing how of little value the university was in its infancy.

Frank D. Gifford read the founders' day poem which was in substance a tribute to the founders of the university. The notable feature of the programme was the oration delivered by Finley Melville.

He outlined in detail the advantages which the present university has to offer and charged the students with the duty of a passive disloyalty to their alma mater by not "boosting" it.

Following the exercises the students sang the "Palisades."

SCHOOL ROOF GARDEN ORDERED.

Opposition of Bayonne's School Superintendent Is Futile.

A roof garden on a public school was decided upon by the Board of Education of Bayonne, N. J., at its meeting Thursday night. The architects, Gilbert & Betelle of Newark, submitted plans and they were approved by the Board of Education and Mayor Matthew Cronin. The roof garden will contain swings and other sources of amusement for the children.

The money that will be spent on this roof garden should be used to build more school rooms. Bayonne is sadly in need of more school rooms and I think it folly to spend money on a roof garden of educational value which is still in doubt.

COMMERCE MEN END VISIT WITH BOAT TRIP

ARE TOLD ABOUT MAYOR

Dr. Finley Suggests That Mr. Gaynor Is Not Unlike Montaigne.

Improvement in the conditions of international trade.

Dr. John H. Finley, as presiding officer, disclaimed any responsibility in speaking for the Mayor.

"All who know him," said Dr. Finley, "know the impossibility of speaking for him. He speaks for himself."

He went on to compare his Honor with Montaigne, so little known to posterity as a one time Mayor of Bordeaux, so well known as a philosopher and essayist.

"In the future, perhaps," he continued, "Mayor Gaynor will be remembered in the greater fame of a philosopher."

James G. Cannon, president-elect of the Chamber of Commerce of the State of New York, followed Mr. Towne and echoed his apologies for the torn up condition of the city's streets and an explanation of the extensive remodeling of the buildings which had called forth many wondering comments from the visitors.

They were reminded that in six days the Lord, had made heaven and earth, but that New York was still unfinished.

President Louis Canon Legrand of Mons, Belgium, who has been president of the Chambers of Commerce of fifty odd nations, the panorama of New York's waterfront was unveiled yesterday as a sequel to their previous day's tour of Manhattan Island.

They inspected the harbor from the decks of the Hendrick Hudson, they were lunched by the Chamber of Commerce, and in the afternoon in the hall of the United Engineering Societies building, with an official expression of New York's appreciation of their visit and with their best wishes in return they formally concluded their American tour.

Most of them will start for home to-day. The final farewells to the city and to the committee of the Boston Chamber of Commerce, which planned and carried out the Western trip, were reserved for an impromptu dinner given at Sherry's last night by the delegates themselves as an unexpected token of appreciation of their hosts' kind treatment.

Mayor Gaynor was unable to be present at the farewell exercises. Chairman John H. Finley, president of the College of the City of New York, in explaining the Mayor's absence took occasion to describe him to the strangers as a man who filled the hardest job in the United States, and filled it courageously and philosophically.

Shortly after ten o'clock yesterday morning, amid a fluttering of Baedekers and a babel of tongues, the Hendrick Hudson glided away from the recreation pier at the foot of East Twenty-fourth street. Her cosmopolitan passenger list had come to marvel and marvel they did. They began with the vessel itself and its capacity. Licensed to carry 5,800, the 800, including invited New Yorkers who took the trip to-day made a scant load.

Through the Channel of the Hudson River Day Line and Passenger Agent Townsend were indefatigable in setting straight confused but earnest sightseers.
